Image	 A small, grey, rectangular frequency inverter unit with a digital display showing '5000' and several control buttons.	 A larger, black, rectangular frequency inverter unit with a digital display and a central control knob.	 Two black frequency inverter units, labeled NE9000 and NE900 from left to right, both featuring large touchscreens and complex control panels.
Color	White/grey	Grey	Grey
Name Define	Mini inverter	General frequency inverter	Frequency inverter with CLVC
Market strategy	Economy for speed control	General inverter	High performance inverter
Application Characters	Simply for speed control, cheap	High-cost effective; Suitable for fans, pumps, and most of the general industry	High performance inverter with CLVC and torque control. Suitable for both open loop and closed loop synchronous motor (NE92000); available volume calculation function module (NE9100)
